Phalanx Token

A utility token of the phalanx trade bot ecosystem, phalanx token is built on the Binance Smart Chain (BSC) and has no affiliation with any other products or companies with that or similar name.

Phalanx Token

Why BSC?

Binance Smart Chain was developed as a means utilizing solidity based smart contracts with much greater speed and efficiency than other competing chains. It's a sovereign blockchain providing security and safety to all users and developers, offering lightening-fast swap and extremely low fees. Becoming one of the most widely used blockchain for Decentralized Finance (DeFi).

Protocol

Phalanx token employs four (4) simple functions: Reflection + LP Acquisition + Marketing Fund + Auto Burn. Each transaction is charged 10% fee which is split 4 ways.

Contract Address

0x321d88dC75Dff997376c177bbE4E9D49ad89F662

Set buy and sell slippage: 10% - 12%.

3% of transaction fee are redistributed to all existing holders as an instant rewards/auto-staking. That means you earn more phalanx token just by holding it in your wallet.

3% of transaction fee is split 50/50, half of which is sold by the contract into BNB and paired automatically with the other half as liquidity pair on PancakeSwap, stabilizing the price floor of phalanx token.

3% of transaction fee is sent to marketing wallet for marketing push and speeding up phalanx trade bot adoption rate across the globe.

Protocol

1% of transaction fee is sent to burn address. Makes phalanx token hyper-deflationary adding to 30% initial burn from total supply, as more transaction fees are collected circulating supply deflates permanently increasing phalanx token price over time. The higher a token marketcap and lower it's circulating supply, the more valuable it will be in the future.

Phalanx token features exceptionally favorable tokenomics making it a good investment choice for long-term holders and diamond hands. Design with early investors in mind.
